Summary

Passionate Developer | React Native Enthusiast | Lifelong Learner

With a strong web and mobile development foundation, I work with HTML, CSS, Tailwind CSS, React.js, and React Native to create engaging, functional applications. My most extensive project to date is a feature-rich restaurant app built entirely in React Native, showcasing my ability to bring complex ideas to life on mobile platforms.

I'm dedicated to growing my skills and consistently sharing updates on my journey with weekly posts here on LinkedIn, covering insights, project highlights, and lessons learned. Excited to connect with fellow developers and tech enthusiasts!

Education

Squad coders dev

Front-End development , Front-End development · (August 2023 - August 2024)
